Battery tender junior rapid flashing green

Skip to main content Showing 1-10 of 19 answers According to the documentation from the company site "GREEN LIGHT FLASHING (1.25A only) - When the green light is flashing, and the red light is on, the battery is greater than 80% charged and may be removed from the charger and used if necessary. Whenever possible, leave the battery on charge until the green light is solid". The manual can be found at Ward Souders · January 10, 2014 9 of 15 found this helpful. Do you? | Report abuse my battery tender has a steady green when fully charged. my tender is the model that puts out 750mA a different model might be different. don donny · January 10, 2014 1 of 2 found this helpful. Do you? | Report abuse Unplugged my battery tender when light was steady green and when replugged it in it would flash green on and off. It is a .75 amp charger Is this normal Amazon Customer · June 2, 2019 Do you find this helpful? | Report abuse Unplugged my battery tender when light was steady green and when replugged it in it would flash green on and off. It is a .75 amp charger Is this normal Amazon Customer · June 2, 2019 Do you find this helpful? | Report abuse To quote the Battery Tender "Safety Instructions": "Green Light Flashing: When the green light is flashing, the battery is greater than 80% Charged. For BT Plus models, the red LED will also be on Steady." swamper · January 13, 2014 9 of 9 found this helpful. Do you? | Report abuse My husband says it will flash until it's fully charged and then just be steady green. Maybe you can Google for more info. I bought this one for a gift. Carol J. Dingwell · January 11, 2014 6 of 8 found this helpful. Do you? | Report abuse Battery tender flashing both green and red SUSAN · November 10, 2016 1 of 1 found this helpful. Do you? | Report abuse Battery tender flashing both green and red SUSAN · November 10, 2016 1 of 2 found this helpful. Do you? | Report abuse Forums > General Tech Harley Davidson > Other Service and Maintenance > (You must log in or sign up to reply here.) Forums > General Tech Harley Davidson > Other Service and Maintenance > To quote the Battery Tender "Safety Instructions": "Green Light Flashing: When the green light is flashing, the battery is greater than 80% Charged. For BT Plus models, the red LED will also be on Steady." What do the lights mean on battery tender? The red light will remain on until the charger completes the charging stage. > GREEN LIGHT FLASHING (1.25A only) - When the green light is flashing, and the red light is on, the battery is greater than 80% charged, and may be removed from the charger and used if necessary. How do I know if my battery tender is charging? If the battery is fully charged, then the Battery Tender Plus battery charger's green light will be on. Once the AC power is removed from the Battery Tender Plus battery charger, the green light will go out and the charger not have any effect on the battery. Why is the light on my battery charger blinking? Fast flashing indicates a poor connection between the battery and charger or a problem with the battery pack. Remove the battery from the charger and then use a dry cloth or cotton swap to clean the metal contact terminals on the battery. If the flashing continues, then the battery may need to be replaced. How does the green light work in a car battery? Typically a light green dot indicates a fully charged battery. A dark green/black indicator on a maintenance-free battery typically indicates that the battery needs a charge. The electrolyte has gone through a chemical reaction; it's now closer to water. How long does it take for battery tender to turn green? So it will take 6 to 8 hours for the green light to come on. Fortunately, the Battery Tender Plus has the ability to continue to supply its full current even after it has switched over to the lower, float, maintenance charge voltage of 13.2 volts. Why won't my battery tender charge my battery? If you try to charge a drained battery, it won't charge because it has a polarity sensor that needs some minimal voltage (2 volts) to detect the polarity to prevent reversed polarity charging/shorting it. Then connect the charger to the dead battery with the jumper cable connected. Will Battery Tender charge a dead battery? Therefore, a fully discharged 15 Amp-Hour battery will take approximately 16 hours to recharge to 80% capacity. WORKING WITH A DEAD BATTERY OR A BATTERY WITH A VERY LOW VOLTAGE: If you try to charge a dead battery having a voltage below 3 Volts, the Battery Tender's Junior charger will not start. What does it mean when my cart charger is green? A green light flashing on the battery charger of your golf cart usually indicates the charge level of the battery. Short green flashes mean the charge level is below 80%, where long flashes mean the charge level is above 80%. If it is one solid green light it indicates the golf cart's battery is fully charged to 100%. How do you make a battery charging level indicator? Battery Percentage Indicator Step 1: Take All Parts As Shown Below. Parts required - Step 2: Solder All Components in PCB. Step 3: Insert All LEDs in PCB. Step 4: Solder All Wires. Step 5: Insert All Resistors. Step 6: Solder All Wires of Resistors. Step 7: Next Solder Input Wire. Step 8: Circuit Is Ready. How does battery magic eye work? How Does the Magic Eye Work? The coloured ball will float when its surrounded by the well-charged electrolyte in the car battery. On the other hand, the ball will sink when the electrolyte is under-charged. Another phase is when the electrolyte is at a low level where you will see a clear magic eye. Status Indicator Lights: RED FLASHING - When the red light is flashing, the AC power is applied to the charger & the microprocessor circuitry is functioning properly, but the DC output cables are not connected correctly. GREEN - When the green light is lit, the battery charger is in the storage mode of charge. What do the lights mean on my battery tender? The two-colored status indicator lights are available to determine whether the charger is operating in one of the 3 primary charge modes: the bulk mode (full charge, constant current, battery is 0% to 85% charged), the absorption mode (high constant voltage, battery is 85% to 100% charged), or the storage/float ... How do I know if my battery tender junior is charging? If the battery is fully charged, then the Battery Tender Plus battery charger's green light will be on. Once the AC power is removed from the Battery Tender Plus battery charger, the green light will go out and the charger not have any effect on the battery. What does a flashing green light on a battery tender jr mean? > GREEN FLASHING - When the green light is flashing, and the red light is on, the battery is greater than 80% charged and may be removed from the charger and used if necessary. Leave the battery on charge until the green light is solid whenever possible. What does a flashing green light on a battery tender mean? To quote the Battery Tender "Safety Instructions": "Green Light Flashing: When the green light is flashing, the battery is greater than 80% Charged. For BT Plus models, the red LED will also be on Steady." Will a battery tender junior charge a dead battery? A completely dead battery should take at least 35-45 hours or more with a Battery Tender Junior (0.75 amps), and 20-30 with a Battery Tender Plus (1.25 amps). Unfortunately, these chargers cannot begin to charge a fully depleted battery. They need to sense a certain amount of voltage before they can function. What does a blinking green light mean on a battery? charging Yes, a blinking green light means it is charging. A rapid blink means the battery is bad. A green light means it is charged. What does it mean when the green light is flashing on a battery tender? Why is my battery tender blinking green and red? If you connected the battery wrong, it will blink red then green alternating colors. This red-green blinking means you hooked up the battery "polarity" wrong. How long does it take for battery tender to turn green? 6 to 8 hours So it will take 6 to 8 hours for the green light to come on. Fortunately, the Battery Tender Plus has the ability to continue to supply its full current even after it has switched over to the lower, float, maintenance charge voltage of 13.2 volts. What is a battery tender junior? The Battery Tender Junior is a fully automatic and microprocessor-controlled 12-Volt 750-mA battery charger. It is designed to bring a battery back up to a full state of charge and then maintain a battery at 100% indefinitely without the worry of typical trickle chargers that sometimes overcharge and burn up batteries. Can I use a battery tender? To use a Batter Tender battery charger, connect the Battery Tender to a power outlet, and then connect the positive and negative alligator clips to the discharged battery's positive and negative terminals. Consult the Battery Tender device's instructions before attempting to charge a battery. How does a battery tender work? A battery tender, on the other hand, has circuitry that monitors the battery and charges only when the voltage has dropped below a preset level, thus preventing overcharging and damage. When it senses the voltage has dropped, a battery tender will resume charging. What does a battery tender do? A battery tender, on the opposite hand, has circuitry that controls the battery & charges only if the voltage has decreased below a preset level, so stopping overcharging & damage. If it senses the voltage has fallen, a battery tender will continue charging.
